

# DAKOTA CAM

## Adjustable Torsion Bar Lever

[Part # SMX-RMCJR

**All New INNOVATION From SuspensionMAXX:** The DAKOTA Cam Adjustable Torsion Bar Lever. Designed to help 1997-2004 Dodge Dakota 1998-2003 Durango 4x4 owners 'grab life by the horns', the Dakota Cam Leveling Kit benefits from all the best features of the original Dodge-designated RAMM Cam, Built entirely from ultra-rigid 4140 heat-treated alloy steel and features the SuspensionMAXX patent-pending cam locking design. This provides owners with up to six selectable front ride height positions ranging from 1.2-inches lower than stock to 2.0-inches above stock with absolutely no loss of ride quality or handling ability!

Forget dealing with look-a-like, fixed height torsion bar keys! With SuspensionMAXX's Dakota Cam, Dodge owners now have a product built to grow with their truck through a variety of potential uses, work or play! Additional ground clearance, extra room for big wheels and tires, compensation for heavy front-end accessories, and much, much more! All this with an industrial-grade powder coat and price tag sure to make enthusiasts cheer! Backed with Suspension MAXX's "Lifetime Structural Warranty".
